

IHA AI TOOLKIT

PRACTICAL RESOURCES FOR AI ADOPTION

A SHARED COMMITMENT TO REIMAGINING HEALTHCARE IN IOWA FOR LIFE-CHANGING OUTCOMES.

The IHA AI Toolkit is a hospital-focused resource that helps leaders understand, evaluate and prepare for artificial intelligence. It brings key considerations into one approachable framework, from organizational readiness and governance to vendor evaluation, implementation and change management.

HOW IT HELPS HOSPITALS

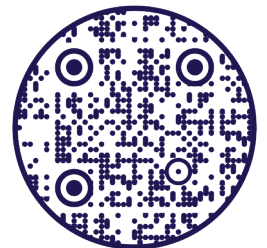

WHY IT WAS CREATED

AI is advancing quickly, while hospitals face real questions about where to begin, how to assess value and how to protect patients, staff and organizational trust. IHA created the toolkit to give member hospitals a clear, practical starting point that supports informed decisions and responsible innovation, regardless of size, location or current level of AI experience.

START WITH CONFIDENCE. BUILD WITH PURPOSE.

Explore the toolkit to guide conversations, align leaders and take the next responsible step with AI. Scan the QR code to take you to the IHA website to view our AI resources.

Questions about IHA's Healthcare Innovation initiatives can be directed to Abhay Nadipuram, IHA Chief Legal Officer, or to innovation@ihaonline.org.
